About City Telecom Limited:

City Telecom Limited provides integrated communications services in Hong Kong via its own self-built fiber network. **City Telecom's** wholly-owned subsidiary, Hong Kong Broadband Network Limited (HKBN), is the second largest and fastest growing broadband service provider in Hong Kong. HKBN also offers international calling, local voice and video service as well as small business services. The company has over a million subscribers for broadband, local telephony, IP-TV and corporate data services. The company focuses on the residential segment, which contributes 83% of total revenues with the remaining 17% from business customers (primarily small businesses). About 15% of revenue comes from international voice services and this segment continues to decline on intense competition and continued focus on fiber-based services. City Telecom was founded in 1992.
